

S.S ENGINEERING WORKS

COMPLETE SOLUTION FOR FOOD PROCESSING & PACKAGING MACHINE

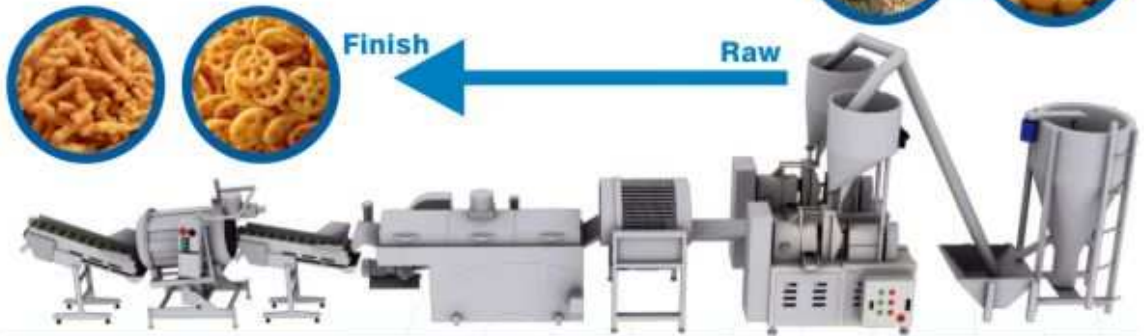

S.S. ENGINEERING WORKS

MIXING

About us

We feel proud to introduce ourselves as a leading and well-known name in manufacturing and exporting Food Processing Equipment. We provide complete solution to the food processing industry by our diverse products range. Our products are known for impeccable design, high performance, low maintenance, minimum wear and tear, durability, low operating cost and ease of operation making it an ideal choice for our valued customers for their food processing business. In a short span of time these products have created a niche for themselves in the market and helping expand our customer base.

We are committed always to live up to our customers expectations and contribute significantly to the ever-growing food processing industry.

Vertical Mixer Products - All Type

Production cap. (1200 kg/hr.)

We are the manufacture of Vertical Mixer & Conical Mixer. We use the quality material in whole manufacturing process to offer the quality product. Vertical mixer has its vertical shaft which lift the feed ingredients to the top & whirls it.

FEATURES

- Elegant Design
- Easy replacement of grinding wheels
- Easy to maintain

SPECIFICATIONS

- Gross Cap. (100-2000) Kg/hr
- Discharge Value : 50kg
- Dimensions: As per requirement.

Batch Mixture Products - All Type

Production cap: (20-500)Kg

We are the manufacture & Exporter Of food Processors. This M/C mixes the different type of materials in dry & wet conditions. In market it is generally used for dough making.

FEATURES

- Easy to operate
- Tough and tensile
- High Capacity
- Hassle free operation

SPECIFICATIONS

- Gross Cap. : (50-1000)Kg
- Dimensions: As per Requirement.

EXTRUDING

KurKure Extruder

Products : All Type
Production Capacity : (80-250) Kg/hr

We are manufacturer & exporter of comprehensive range of KurKure Extruder Machines. The manufacturing of these M/C is done in compliance with the international parameters and market demand. Our machine are manufactured by industry engineers using supreme quality of mild structure tubes that ultimately enhance the performance of the machine. The kurkure extruder machine is available in various capacities...

FEATURES

- Low maintenance cost
- Easy to operate
- Less wear and tear
- Optimum Performance

SPECIFICATIONS

- High Performance
- Low Maintenance
- Low operating cost
- Power efficient

Twin Screw Extruder

Products : All Type
Production Capacity : 300 kg/hr.

Twin Screw Extruder is used to process different kind of food stuff e.g. breakfast, cereals snacks, fryums, balls of meat analogues. It also sterilize by high Temp. in Extruder . Mixing , Kneading, moulding, starch gelatinization Protein denaturation structure – modification , structure generation.

FEATURES

- Easy to operate
- Tough and tensile
- High Capacity
- Hassle free operation

S.S. ENGINEERING WORKS

PROCESSING

Sifter Products: All Type

Production Capacity : (150 – 300) kg/hr.

Our Sifter are multi-purpose and useful for powder, liquid, granule and other small and diverse products. It offers high standards in hygiene and ease of operation. It is also able to separate the granule and powder to improve quality. Its unique and beautiful design and high performance quality makes it a preferred choice for food processing industry.

FEATURES

- Ease of operation
- Low Maintenance
- Low operating Cost
- Minimum wear and tear.

SPECIFICATIONS

- Dimensions: As per customer requirement
- Power: 0.5 H.P.

Rotary Roaster Products: All Type

Rotary Roaster available at relatively low cost & also can be maintained at low operational cost. Moreover our machine gives high production yield. Productivity versus cost ratio is very profitable. This machine is used to roast Kurkure, Rings, Puffs, Cheese Balls, Peanut etc.

FEATURES

- Low operating Cost
- Ease of operation
- Low Maintenance
- Minimum wear and tear.

SPECIFICATIONS

- A.C. Motor 1 H.P.
- Gage Size 2"
- Heater : 6 or 9 (2KW)
- Power: As per requirement
- Length : (12-18) Feet

Belt Conveyor Products: All Type

Speed - 100m/min

We hold expertise in offering our clients superior quality packaging conveyor system, which are fabricated using quality material. Besides to provide world-class range of packaging conveyor, we manufacture them using advanced technology and sophisticated tools. To meet wide packaging needs, these are extensively used in various industries.

FEATURES

- Highly durable
- Optimum performance
- Easy to operate

SPECIFICATIONS

- Dimension (L* W* H*)(As required)
- Power: As per Requirement

Vibro Sifter Products: All Type

Production Capacity :

Our company is a leading manufacturer and supplier of Vibro Sifter. It consists of circular gyratory screens used to separate solids from solids, liquids from solid and for gradation of materials. It is designed in such a way that multi plane vibration is achieved using a specially designed vibratory motor. It is competitively priced.

FEATURES

- Easy dismantling
- Optimal surface finish
- Low power consumption

FRYING

Continuous Automatic Fryer Systems Products : All Type

Production Capacity :1000 Kg/hr.

Used as equipment for frying various types of namkeens – bhujija, tryuro, kulkure, nuts etc. our Continuous Automatic Fryers are sturdy, corrosion resistant with minimal noise which can be operated on multiple fuels as per availability.

FEATURES

- Less wear and tear
- Optimum Performance
- Low maintenance cost.

SPECIFICATIONS

- Capacity :300-1000Kg/hr (Nuts)
- Dimension: 550*1200*2100mm
- Frying Area: As per product design
- Fuel: Diesel/Gas

Continuous Deep Fryer Products : All Type

Production Capacity :300 Kg/hr

Our industry compatible Fryer System are fabricated out of prime Stainless Steel with varying basket size ,depending on output required. These precision engineered system are ideal for deep frying snacks & namkeens, wafers which make them crispy.

FEATURES

- Excellent Functionality
- High Capacity
- Low Maintenance
- Easy to Operate

SPECIFICATIONS

- Roller Material: PVC, Stainless Steel
- Frame Material: Carbon Steel & Stainless Steel
- Dimensions as per requirement

Continuous Conveyor Dryer Products : All Type

Production Capacity :

Manufactured with varying capacities for big and small industries alike, our Continuous Dryers are used for drying a multitude of snacks and namkeens with non-stop operation. An added feature of dust collection during operation ensures superlative, crispy products.

FEATURES

- Easy to operate
- Optimum performance
- Highly durability
- Dust collector is attached

SPECIFICATIONS

- Dimension(L*W*H): As per client requirement
- Capacity: Elect./Fuel
- Motor power: (5.5-7.5) kw
- Electricity Load: As per products

Tray Dryer Products : All Type

Production Capacity :(10-48) Tray

With the help of a state-of-the-art plant machinery and latest technology, we have been able to offer optimum quality Tray Dryer. Manufactured in accordance with the industry set standards, the offered dryers are known for their rich attributes such as long term functional life, ease of installation and maintenance, user friendly operation and minimal noise. An added feature of dust collection during operation ensures superlative, crispy products.

FEATURES

- Easy to operate
- Optimum performance
- Highly Durable
- Dust Collector is attached
- Low Maintenance

SPECIFICATIONS

- Dimension (L*W*H): As per client requirement
- Motor Power: As per customer requirement
- Electricity Load: As per products.

S.S. ENGINEERING WORKS

FLAVORING

Slurry System Products : All Type

Production Capacity : (50-1000) Lt.

Our high-end Flavouring Drums are used for snacks flavouring & roasting, slurry mixing & flavouring and electrostatic seasoning of a number of snacks including all dry & wet types – providing uniform flavouring, adding taste to processed snacks in the required measure. The equipment can be custom designed with required dimensions and added feature of dust collector for hygienic products.

FEATURES

- Easy to operate
- Optimum performance
- Highly durability
- Dust collector is attached

SPECIFICATIONS

- Power(W):
- Dimension : As per customers' requirement
- Weight:
- Capacity
- Motor power:

Dry Fruit Roaster Products : All Type

Production Capacity : (200) kg/hr

Our range of roaster machines is widely acknowledged for easy operation - designed in compliance with international quality standards these are widely used to roast peanuts, cashew nuts and almonds in an effective manner. Available in both standard as well as customized options, these machines have the capacity to roast 200 kg per hour.

FEATURES

- Easy to operate
- Optimum performance
- Highly durability
- Dust collector is attached

SPECIFICATIONS

- Power: 1HP AC Motors with gear box
- Electric heater Cap: 18KW
- Size: As per Requirement
- Temperature: 0 To 300°c
- Capacity: 500 Kg/hr

Coating Tumbler Products : All Type

Production Capacity : (100-200) Kg/hr

To meet the diversified requirements of our prestigious clients. We offer high quality Coating Tumbler which is made out of high quality raw material that we sourced from the genuine vendors of the market and sophisticated technology and these machines are widely admired for their quality and longer life. We offer Coating Tumbler to our clients at most reasonable prices.

FEATURES

- Application specific design
- Easy to maintain
- Durability

SPECIFICATIONS

- A.C. Gear Motor: 1 HP
- Length: As per requirement

Coating Pan Products : All Type

Batch : (25-50) Kg/hr

We are among the industry pioneers offering Coating Machines to our esteemed customers. Various kinds of snacks can be coated with any kind of masala using these machines.

FEATURES

- Easy to clean and maintain
- Sturdy design
- Optimal performance
- Easy to operate

PACKAGING

Packaging Machinery Products : All Type

Production Capacity :100 shot@/min.(1/2 kg.cap.)

We are the supplier of quality based innovative packing machinery for quality output & complete client service.

FEATURES

- Perfectly designed
- Easy to operate
- Highly durability

SPECIFICATIONS

- Power(W): As per requirement.
- Dimension: As per requirement.
- Weight: As per requirement.
- Capacity: As per requirement.
- Motor power: As per requirement.

Doctoring Machinery Products : All Type

Speed :350m/min

We feel to introduce our self as a renowned manufacture and supplier of doctoring machines.

Our varied range includes Doctoring Machines. With our hard work and determination we have designed this with a vision to salvage/rectify printed/unprinted substrate after slitting, using load cell & ultrasonic Web Guide System, cork fill/retape.

FEATURES

- Highly durability
- Optimum performance
- Easy to operate
- Dust collector is attached.

SPECIFICATIONS

- Dimension (L* W* H)(As per requirement)
- Power:
- Gear Box:
- Electrical Control:

Slitting Machinery Products : All Type

Speed :300m/min

This multipurpose high-speed Slitting Machine is a duplex, cantilever, centre winding machine capable of handling virtually any material from high tensile film, aluminium foil and film laminates at high speeds. It is designed for easy operation with maximum automation and productivity. It provides an economic and easy solution to cater to the increased production demands by upgradation to a higher level of automation.

FEATURES

- Easy to operate
- Optimum performance
- Highly durability
- Dust collector is attached

SPECIFICATIONS

- Working width : 1000 mm maximum
- Slit width : 50 mm minimum
- Designed line speed : 300 rpm maximum
- Un-winder diameter : 1000 mm maximum
- Re-winder diameter : 600 mm maximum

Conveyor/Z-type Products : All Type

Production Capacity :220 kg/hr

The bucket conveyor, also known as Z-type Conveyor, is suitable for elevating granular products in grain, food, feed, and chemical industries.

FEATURES

- Tough and tensile
- Excellent functionality
- High capacity
- Hassle free operation

SPECIFICATIONS

- Structure: MS Steel
- Load Capacity: (30-200) Kg/hr
- Dimension(L*W*H): As per requirement
- Length/width: As per requirement
